

Chevrolet Camaro 1998-2002 Fog Lights (clear front lens)

Starting to look like real thing

Is this what people will see approaching their rear view mirrors?
Can't Wait!!! Should have rear end finish sometime next week.

2006 Nissan 350z complete rear end assembly. All Aluminum too!!! Super light weight. It's got slotted/drilled rotors too! When I install it on my frame I will cut off the center section to give the new engine and transaxle room...then I will build 2 new lower support bars. I paid!
