

Some of the preferred choices for transaxles are the following;

915 Transaxel

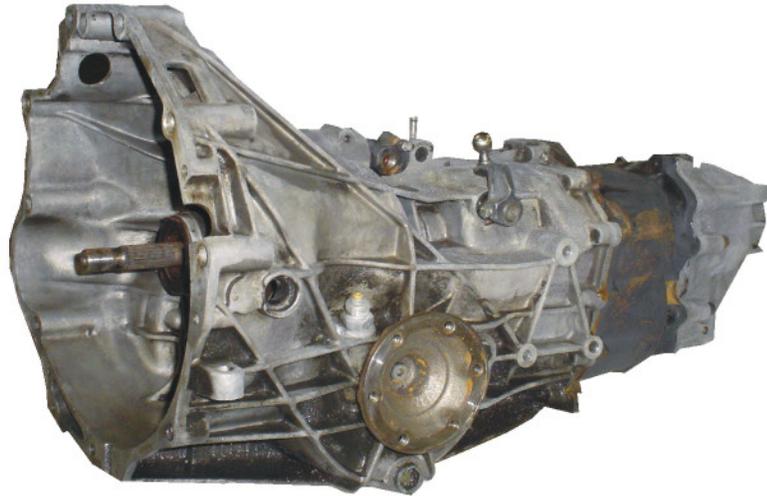

928 Transaxle

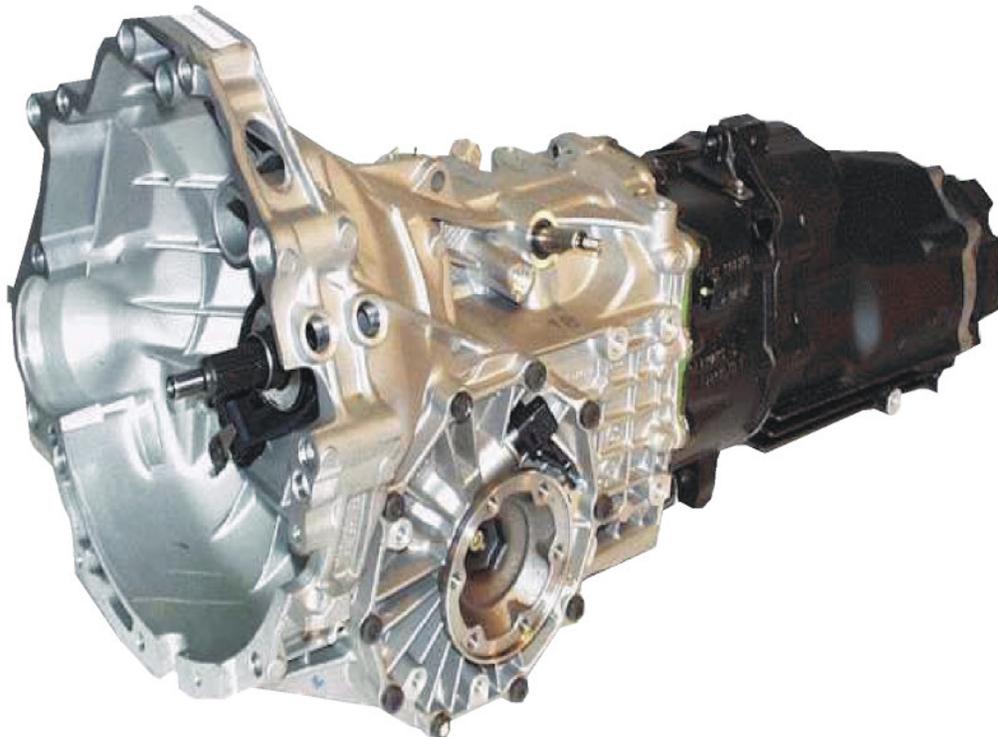

930 Transaxle

Probably the most popular choice is the Audi 5000 Transaxle

Audi 016 Transaxle – 5 speed

Audi 01E transaxle - 5 or 6 speed

Pulling the frame from the cradle assembly

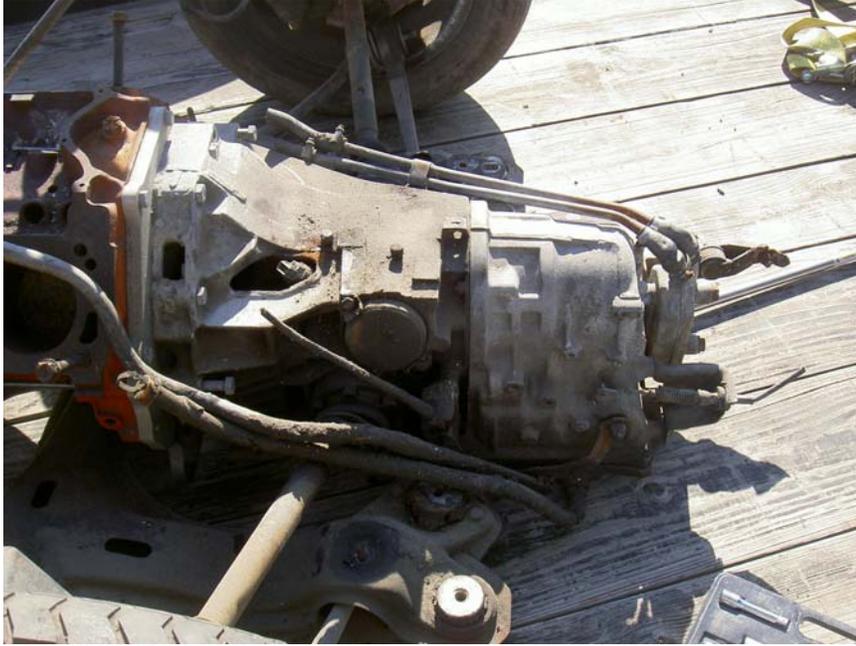

Dummy 351C block for measuring of motor mounts and transmission mounts

Block will be used for alignment purposes

Stripping down to basic assemblies

Audi 5000 Transaxle

Strut towers now loose from the frame.

Need to remove steering linkage and axels

Axels removed from the Audi transaxle. Bolts require a metric “tri-square” tool.

Kennedy Engineering Products (KEP) produces the adapter plate for the 351 Cleveland to Audi 5000 transaxle.
