

Hello Everyone,

If you are receiving this, you are either on a list of people that I have promised pictures of my progress to, someone in my address book that I thought might be interested in seeing them, or reading it on B and B Customs web site.

This first email is the chassis jig constructed of 1 1/2x 3 11ga. tubing. the main rails are 24 inches wide and 12 feet long. The chassis is currently almost finished and I will send more as I have time to edit the photos.

Charley
