

## Redesigning the rear engine cover.

I decided to split the hatch into two pieces, to better resemble the original design

Tools needed before you make the cut!

It's 2 pieces now, Just like the real one!

I took a lot of pictures of the original and cut mine according to the pictures...

Under construction hinges . . . I'm using Iroc Z Camaro / Firebird hood hinges for my engine lid.

This is what the 1982 to 1992 Camaro / Firebird hood hinges look like.
