

Finally a Rolling Chassis

I want to finish my kit before I go on vacation hahaha....well you have a great week. And thanks again for updating the website. I usually go in there and look back at were I started, and go...**wow** I have put a lot of hours into this project. It sometimes doesn't seem like I've done much. But everything is so time consuming it's crazy! But yeah, thanks so much! I hope I finish this car in the next few months. Hopefully for 2010 summer should be done.

I ordered smaller front wheels. I don't like the way it looks. The front looks too high with those 20inch wheels. So I am going with 18 inch on the front and 20 inch on rear. I am also going to bring out the rear wheels out towards the body more. I like the wheels to be almost flush to body.

Becoming a work of art from a “master’s hands.”
